Brief Industrial Profile of Nuapada District

1. General Characteristics of the District

The history of Nuapada is co-related to the history of Ex-Zamindary Khariar. Originally, it was an estate comprising three regions viz; 1) Kholgarh, presently known as Tanwat, Geogarh, presently known as Sunabeda plateau and Kumunagarh, presently known as Komna with its headquarter at Komna. After the defeat of the Marathas in the IIIrd Angle Maratha War in 1818, ex-Khariar estate came under the British Rule and the Headquarters was shifted to Khariar. In 1862, it was tagged to Central Province and in 1864 it was declared as a Zamindary. After the formation of Orissa Province on 01-04-1936, the entire Oriya speaking race of Khariar Zamindary which was then a part of Raipur district under Chattisgarh State, was annexed to Orissa on transfer as a Sub-Division under Sambalpur district. On 01-04-1993 it was declared as a separate district and started functioning with headquarters at Nuapada. The district of Nuapada came into existence with effect from 1st April, 1993 by carving out of the Nuapada Sub-Division of undivided Kalahandi district.

1.1 Location & Geographical Area.

Nuapada district occupies the southwestern part of Orissa and is situated between 20 degree 20 North and 21 degree 5 Latitude and 82 degree 20 East and 83.47 degree 47 East Longitude. It is surrounded in the North and West by Chattisgarh by Chattisgarh and Dharmagarh sub-division of Kalahandi district in the South and by Bargarh and Bolangir districts in the East. It falls in the western undulated zone of Orissa and has two distinct physiographic regions such as plain land and hilly tracts. The district covers a geographical area of 3852 sq.kms. i.e. 48.02 % of the total land area of the state.

1.2 Topography

The district has two distinct physiographic regions, the plain lands and the hilly tracts. The hilly tracks are mostly located in the western part and the plain regions cover the other part of Nuapada district.

1.3 Availability of Minerals

The important economic mineral resources of Nuapada district include limestone, Graphite, Manganese, Gemstone, Dimension stone and Clay. Commercial grade crystalline limestone and bedded limestone deposits occur in the district. Crystalline limestone deposits of Khariar valley occur as lensoid bodies and bands. Important crystalline limestone occurrences are Chandpala, Sagundunguri, Deobahal, Rohanpadar, Garramura, etc. A reserve of 11.245 million tonnes of cement grade limestone has been estimated from above deposits. Bedded limestone deposits occur in the western part of Sinapalli block around Talkote, Sindursil, Koradunguri, Chitarama, Patialpada etc. Graphite is one of the abundant mineral resource of the district marked around Biwanathpur, Singari, Bijaygarh, Pair, Komna, Barhikomna, Kalimati, Kanditera, Sukulimuri, Salingpara, Tikapada, Katapali, Ganramer, Gania, Salebhata, Debri, Simelpali, Larki, Pandikimal, Surjumunda, Dhumkhenan, Goendimal, Bamhanpadar, Mahuabhata, Jolanketa, Kendubhata, Ghalndia, Sagurujibhata, Chormurda, Dungaripati, Gandapani, kholapala., Larabanji, Dargaon and Gandabahal having a total reserve of 0.51 million tonne. The graphites are low to medium grained flaky, middle, lumping, nodular and amorphous variety. The F.C. content of the graphite varies from 8.71% to 80.64%. Mineralisation of low grade manganese ore are reported around Tikrapada, Lodra, Luharpali, Gandamer, Singari, Chaludia, Talkota, Ghatmal, Patiyalpara, Maraguda. Mineralization occurs as veins, stringer, solution cavities and sporadic in nature. The manganese is loose friable in nature, earthy, grey and dark in colour. The associated rock types are khondalite, calc-gneiss, granite gneiss and laterite. The manganese content upto 24% has been reported from the above occurrences. Gemstone: The gemstones identified in this district are Sardhapur-Patialpada, Katamal-Amera and Damjhor-Budhapada-Mantritarai. The varieties of gemstones of precious and semi-precious nature recorded in the district include sapphire (blue corundum), garnet, iolite etc. In Nuapada district sapphire (blue corundum) occurs in association with syenite pegmatite at fifteen locations around Amera, Badimura, Karlakot, Katamal, Sargimura. Sapphire located at Amera (SSW of Badimura) occurs at the contact of EGMB and Bastar Craton in association with syenite pegmatite. Sapphire recovered from this

area are very small, platy in nature having maximum thickness of 3m (maximum weight one carat) due to their release along basal parting plane. These sapphires are transparent to semi-transparent, light blue to cornflower blue in colour with brilliant luster (vitreous to adamantine). Rare pieces of greenish blue and colourless sapphires have been accorded from these occurrences. Besides these blue corundum occurrences are located around Badimura, Karlakot, Katamal, Sargimura. Directorate of Geology has taken up diamond exploration in Dharambandha area of Nuapada district since 1990. Rigorous efforts in subsequent years in some of the selected areas have resulted in the discovery of multiple pipes of diamondiferous olivine lamproite in the Kalmidadar area near Dharambandha in Nuapada district. Over 100 pieces of diamonds have been recovered from the area during the course of exploration. The decorative/ dimension stone occurring in the district are variants of granite (Pink and grey). These rocks have been exposed around Dharambandha, Bhaira, Dalipathara, Jamarkhol, Lanjmar, Kadapali, Kanwal, Lodra, Bhainsmadi etc. with a resource of 22,4,00,000 cu.m. These granites have deleterious minerals like mica and garnets. These rocks are very hard, fresh, and fine to medium grained, pink to gray in colour. The joint spacings are marked from 0.40m to 2m.

1.4 FOREST

Nuapada district has got 1849.69 sq. kms of forest area out of a total geographical area of 3852 sq. kms. which constitutes 48.00%. The indigenous species generally found are Sal, Bamboo, Teak and other varieties. The minor forest produce species are Mahua, Char, Kendu, Myrobolan, Amla etc.
