## FOREWORD

Every year Micro, Small & Medium Enterprises Development Institute, Cuttack under the Ministry of Micro, Small & Medium Enterprises, Government of India undertakes the Industrial Potentiality Survey for districts in the state of Odisha and brings out the Survey Report as per the guidelines issued by the office of Development Commissioner (MSME), Ministry of MSME, Government of India, New Delhi. Under its Annual Action Plan for 2019-20, all the districts of Odisha have been taken up for the survey. This Brief Industrial Potentiality Survey Report of **Boudh** district covers various parameters like socio-economic indicators, present industrial structure of the district, and availability of industrial clusters, problems and prospects in the district for industrial development with special emphasis on scope for setting up of potential MSMEs.

The report provides useful information and a detailed idea of the industrial potentialities of the district. I hope this Brief Industrial Potentiality Survey Report would be an effective tool to the existing and prospective entrepreneurs, financial institutions and promotional agencies while planning for development of MSME sector in the district.

I would like to place on record my appreciation for Shri Jagadish Sahu, AD (EI) of this Institute for his concerted efforts to prepare this report for the benefit of entrepreneurs and professionals in the state.

(Dr. S. K. Sahoo)  
Director Incharge

Place: Cuttack

Date: 17-07-2020

## **Brief Industrial Profile of Boudh District**

**1. General Characteristics of the District:** The erstwhile Phulbani district got bifurcated into two districts namely Boudh and Kandhmal with effect from 01-04-1993 with an objective of ensuring better administrative control through decentralized process and for focused economic development. History says Boudraj, the ex-state merged with Odisha state in 1949. Boudh district is situated at the central parts of the state. The main stay of the people of the district is agriculture and this continues to be practiced in a traditional method. The yield rate of the district is not encouraging as compared to other districts of the state. As most of the people depend on agriculture, the productivity in agriculture and allied sector is very low. The per capita income of the people is also low. Paddy is the major crop of the district. Besides this, vegetables, pulses, cereals and oilseeds are also grown in most parts of the district. The cash crops of the district are onion, groundnut, potato, tomato and sugarcane. Due to drought and uneven rain fall, there has been no significant improvement in crop production despite the sincere effort of all promotional agencies in the district. The district is situated on the bank of river Mahanadi and Tel. The climate of the district is soft tropical and hut-dry in summer, cold-dry in winter and humid during rainy season. Though, primary activity of the people is cultivation, many of the people depend upon collection of minor forest produce for livelihood. Similarly, weaving is one of the important livelihoods of the people.

Despite having water, forest and agricultural resources, the district remains industrially backward. Many factors are responsible for the industrial backwardness which needs special attention. There is no large and medium scale industry at present. The micro and small enterprises are also very few in numbers due to lack of entrepreneurship among the people.

### **1.1 Location & Geographical Area.**

The district of Boudh is located between 20° 20' and 20° 50' North Latitude and 83° 34' and 84° 49' East longitude in the central part of Odisha. It is bounded by Sonepur district on north, Nayagarh District on the East & Kandhamal district on the South and West. The geographical area of the district is 3098 sq. km.

### **1.2 Topography**

Most parts of the district have black alluvial soil. The referring blocks of Kantamal, Boudh and Harbhanga are full of black alluvial soil which is most fertile due to deposit of salt. Out of 3 blocks, 2 blocks have plain lands and one block has got mixture of plain and hilly ranges. The soil of the district has high moisture retention capacity. The soil is quite rich for growing paddy, pulses, oil seeds and sugarcane.

### **1.3 Availability of Minerals**

There are very few mineral deposits in the district. They are Lime Stone, Graphite and Quartz which are found in Harabhanga and Boudh Blocks. But the commercial production/exploitation of these minerals is not viable.

### **1.4 Forest**

The total forest area of the district is 1277.17 sq.km. which is 41.22% of total area indicating more than the state average and ideal average i.e. 30% of the total geographical area of the district. The forest produce of economic importance in the district are Bamboo, Kendu Leaves, Mahua Flowers/Seeds, Siali Leaves, Timber, Fire wood, Myrabolam, Gendulingama and Tamarind. Over the years, forest suffered serious depletion due to relentless pressure arising from increasing demand for fuel wood, fodder and timber.

### **1.5 Administrative set up**

The district has one Sub-Division i.e. Boudh; 3 Tahasils; 3 Community Development Blocks namely Boudh, Kantamal & Harbhanga; 7 Police Stations; 4 Fire Stations; 69 Gram Panchayats and 1187 villages. There is one town i.e. Boudh in the district. The district head quarters is situated at Boudh.

41	95	Repair of computers and personal and household goods	20
42	96	Other personal service activities	119

Source: www.udyoaadhaar.gov.in as on 31.03.2020.

### **3.5 Large Scale Industries/Public Sector undertakings: NIL**

### **3.6 Major Exportable Item: NIL**

**3.7 Growth Trend:** There is positive growth in the district taking into consideration the availability of resources, infrastructure, manpower and demand.

### **3.8 Vendorisation /Ancillarisation of the Industry:**

As there are no large and medium scale industries in the district, there is little scope for ancillary development. However, some ancillary and downstream industries can be promoted basing upon the requirements of the mother plants located in the neighboring districts. In this era of liberalization the place or locality is not a rigid

criteria for development of ancillary industries. Ancillarisation can be done taking into view the requirement and demand of the mother plants located inside the state. Similarly, as a number of large scale industries are on the pipeline for which MOUs have already been signed, there is scope for ancillarization.

### **3.9 Medium Enterprises:** Only three enterprises

1. Shantidevi Enterprises, Ameswar Vihar, Ward No-01 Near BSNL Office , Boudh
2. Ranisati Paddy Processing Pvt. Ltd, At/Po/- Purunakatak, Boudh
3. Ranjit Naik, At- Khajuripada, Po- Mathura, Dist- Boudh

### **3.10 Service Enterprises**

As Handloom is the prominent activity of the district, Handloom weavers have organized themselves into Weavers Co-operative Societies with functional production and marketing society. Thus, there is vast scope for service items like silk twisting, dyeing, sizing, knitting and zari work in the district.

#### **3.10.1 Potential areas for Service Industry**

Activities under service and business sectors generally require less capital and labour intensive in nature. It is widely feasible because of growing need towards these services. The following servicing units are identified for the districts.

- 1) Cycle Repairing / Assembly of cycle parts
- 2) Agro servicing centres
- 3) Retreading of tyres
- 4) Reconditioning of Battery
- 5) Auto repairing/ Automobile workshop
- 6) Diagnostic centre
- 7) Colour Laboratory/ Digital photo studio
- 8) Nursing home /clinic
- 9) Audio and video repairing and servicing centre
- 10) Tent house
- 11) Herbal health treatment clinic
- 12) Advertising Agency
- 13) Restaurant /Hotel
- 14) Laundry
- 15) Tailoring
- 16) DTP/Screen printing
- 17) Welding/lathe works
- 18) Repairing of electrical and electronics home appliances.

- 19) Grocery shop
- 20) Mobile Repairing
- 21) Silk Twisting
- 22) Dying
- 23) Sizing
- 24) Knitting
- 25) Zari work

### 3.11 Potential for new MSMEs

Taking into consideration the availability of raw material and local demand, the following resource based/ demand based MSMEs are suggested.

1. Plantation and extraction of herbal ayurvedic medicines and cosmetics.
2. Cold storage/rural godown/onion storage
3. Rice milling/rice huller
4. Handloom fabrics/readymade garments
5. Bamboo works
6. Particle/corrugated board
7. Stone crusher/chips
8. Fly ash bricks
9. Leaf cup and plates
10. Cattle/Poultry feed
11. Jewellery work
12. Silk Saree
13. Fabrication/Furniture
14. RCC Hume pipe
15. Dyed Silk Yarn
16. Food Mixture
17. Paper Cup
18. Readymade Garment
19. Clay Tile
20. Turmeric grinding
21. Agriculture implements
22. Lok Bastra
23. Cement products
24. Dairy products

## 4. Clusters of Micro & Small Enterprises

### 4.1 Details of Potential/Ongoing/Existing Clusters

Sl No	Name of the Cluster (Product)	Location	District	No.of MSMEs in the Cluster (approx.)	Any intervention undertaken in the Cluster	Cluster is suitable for which Scheme	Nodal Agency ( DIC/ Association/ NGO etc.)
1	Rice	Boudh	Boudh	8	No	ZED	DIC, Boudh

13	Handloom	Laxmi Prasad	Boudh	148	Intervention by Director of Handicraft & Textiles, Bhubaneswar Completed	-	Director of Handicraft &Textiles , Bhubaneswar

### 5. General issues raised by Industry Association:

As no active industry association exists in the district as reported by DICs, some leading entrepreneurs are contacted and their views are noted.

- a. There is no industrial climate. People lack entrepreneurship and they do not have interest on value addition for which wider sensitization and awareness is required.
- b. Lack of marketing facilities due to poor infrastructure facilities for which there is need for improvement in infrastructure and transportation.
- c. No railway line exists in the district which inhibits industrial growth.
